<b>Investment Objective</b>	To provide regular current income by investing globally in companies with either direct or indirect exposure to infrastructure.	To provide regular current income by investing globally primarily in real estate investment trusts (REITs) and equity securities of corporations participating in the residential and commercial real estate sector.	To achieve above average long-term capital growth that is consistent with a conservative investment philosophy encompassing a diversified portfolio approach. The Fund invests primarily in equity securities of Canadian companies that demonstrate financial strength and good growth potential.	To provide investors access to a global balanced fund seeking capital appreciation and a steady stream of current income.	To provide superior long-term investment returns through capital growth. The Fund invests primarily in common shares and debt obligations anywhere in the world other than Canada. The portfolio will predominately consist of large capitalized growth companies anywhere in the world other than Canada.	To provide investors exposure to North American equity securities seeking long-term capital appreciation.

\*Where this is a new fund, the risk rating is only an estimate by Starlight Capital. Generally, we determine the risk rating for each fund in accordance with a standardized risk classification methodology in NI 81-102 that is based on the fund's historical volatility as measured by the 10-year standard deviation of the returns of the fund. Standard deviation is a common statistic used to measure the volatility and risk of an investment. Funds with higher standard deviations are generally classified as being more risky. Just as historical performance may not be indicative of future returns, a fund's historical volatility may not be indicative of its future volatility. You should be aware that other types of risk, both measurable and non-measurable, also exist.

<sup>1</sup>Active share measures the percentage a portfolio's holdings that are different from those in its benchmark. Active share shows how the manager is actively exploiting opportunities that are not reflected in the index. The benchmark used for analysis for the Starlight Global Infrastructure Fund and the Starlight Private Global Infrastructure Pool is the S&P Global Infrastructure Index (CAD) and for the Starlight Global Real Estate Fund and the Starlight Private Global Real Estate Pool is the FTSE EPRA/NAREIT Developed Total Return Index (CAD). The benchmarks used for the Starlight Global Private Equity Pool is a 70/30 blend of S&P/TSX Composite Index (CAD) and the S&P 500 Index (CAD). The benchmarks used for the Starlight Private Global Real Assets Trust is a 50/50 blend of the S&P Global Infrastructure Index and the FTSE EPRA NAREIT DEVELOPED Total Return Index.
